

Topic Modeling

Friday march 14

- Demo of embeddings on Wikipedia

<https://colab.research.google.com/drive/16wQ3o8XQNEhADR2v2ibwfvjaKXKvkyKW#scrollTo=BmDaMASGj-Lz>

Today

<https://maartengr.github.io/BERTopic/index.html>

Today

- # Compare BERTopic with traditional methods
- # Advantages:
 - # 1. No need for extensive preprocessing
 - # 2. Better semantic understanding through contextualized embeddings
 - # 3. Automatic determination of topic numbers
 - # 4. Better handling of polysemy and synonymy
 - # 5. Superior topic coherence
-
- # Limitations:
 - # 1. Computationally more intensive
 - # 2. Requires more memory for large datasets
 - # 3. Less interpretable than traditional methods like LDA
 - # 4. Embedding quality affects results significantly
